

# THE MOST IMPORTANT PORTRAIT OF YOUR LIFE!

## Everything You Need To Know

**At Buivid PhotoDesign we want you to be completely happy with your portraits . If you keep these simple tips in mind, we can give you the Best Portraits possible.**

### How and Where will I be Photographed ?

When you select Buivid PhotoDesign you will be photographed in one of the areas finest photography studios. In addition to Buivid PhotoDesign's huge variety of backgrounds and props in the studio, you may also add an outdoor session to the Deluxe or Ultimate sessions. Many different locations are available for your outdoor session.

### What Should I Wear?

Clothing selection is a very important part of your senior photography session. VARIETY is the key to great looking portraits. A classic sweater, blouse, or suit and tie are great for the traditional head and shoulder portraits. Then, your favorite casual outfit, sports uniform, band uniform, jeans, etc. In addition to a casual outfit, you may want to go to a dressy outfit. Long sleeves and slacks photograph better than short sleeves and shorts, however you may bring one outfit that includes either short sleeves or shorts. Select colors that enhance your skin tones and select colors you like.

### What about My Hair?

Girls, wear your hair the way you normally wear it. DO NOT change your hair style before your photography session. Perms should be done at least two to three weeks before your photography session. Haircuts should be done at least one week before the session for guys. Remember to bring any accessories you may need; spray, barrettes, etc. Guys, it is best to shave right before your photography session.

### What Else can I Bring?

Personalize your photography session with your own props! Prop Ideas: instruments, sporting equipment, bicycles, hobbies, pets, cars, motorcycles, hats, stuffed animals, collections of CD's, posters, etc. The list is endless, let your imagination run wild!

### How Should I Wear My Make-up?

Night time or party make-up should be worn. A good base foundation is a must. It will smooth your skin tones and cover any blemishes you may have. Eye color, cheek color and lipstick enhance your features - muted colors are best. Our lights tend to lighten your natural color so a little extra make-up will look great. Although blemishes may be removed in your finished portraits, you may want to use a cover stick to assure a more pleasing set of original previews. Guys, cover-up on blemishes is good for you too!

### What About My Glasses?

If you normally wear glasses, they should be worn for your portrait session. However, glass reflections and distortions can only be eliminated by special art work on each portrait. (Usually about \$15 - 25 per image). To avoid costly artwork, borrow a set of lens-less frames from your optician.

### What If It Rains, and I have an Outdoor Session?

You may be photographed indoors as scheduled. Summer showers often come and go quickly, it might be raining where you are, but sunny here. Overcast days are actually better than bright sunny days for portraits. The light is soft and flattering. If you have any questions about weather, please give us a call. We can reschedule your session if necessary.

At the time of your portrait session, you need the portrait session fee, unless you have prepaid it to get our Special Discounts. This covers the cost of the studio time and expenses involved with your session. There will be a \$150.00 deposit when you pick up your previews, that is applied toward your portrait order. You pay one-half of balance when you place your order.

### When will My Previews and Order be Ready?

At Buivid PhotoDesign you'll enjoy seeing your previews within two days after your session. You MUST call us to make an appointment for you to view them on our High-Definition Viewing system. Portrait preview book may be taken home with a deposit of \$150.00. You
